THE PROBLEM WITH

CLEAN DATA

procurevue[™]

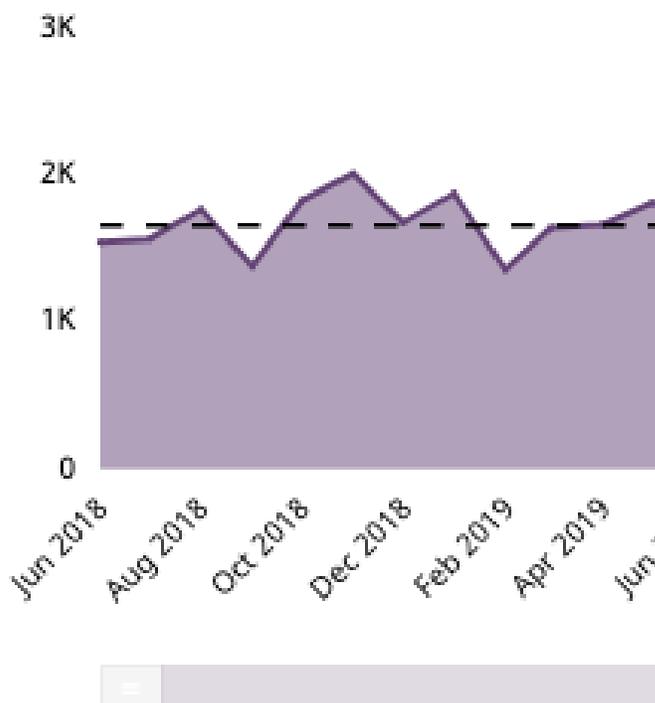

The Problem w/ Clean Data

Clean data is a massive problem for everyone in business, especially procurement. From what we have observed, only some believe it is achievable. Human error, currency conversions, conflicting time zones, languages, and international trade regulations are all factors that muddy the waters of even the most well-designed data governance programs.

Many companies, if not most, are the product of acquisitions or mergers, resulting in multiple levels of additional complexity. Coupled with numerous ERP systems and processes, it begs the question, what is the cost of not achieving the utopia of harmonized data?

Across Selected Time Period

imagine utopia

Imagine the undertaking involved in designing, implementing, training, and monitoring a global governance system in a moderately sized company. How many resources would be needed? Keeping your company in mind, how much time, investment, and effort would you expend to collect clean data? What if I told you we could show you that before you even begin? Idealistic as it sounds, what if I told you we solve these problems every day?

Imagine the cost and impact of such an undertaking for your organization. You certainly can still see the value of doing so...

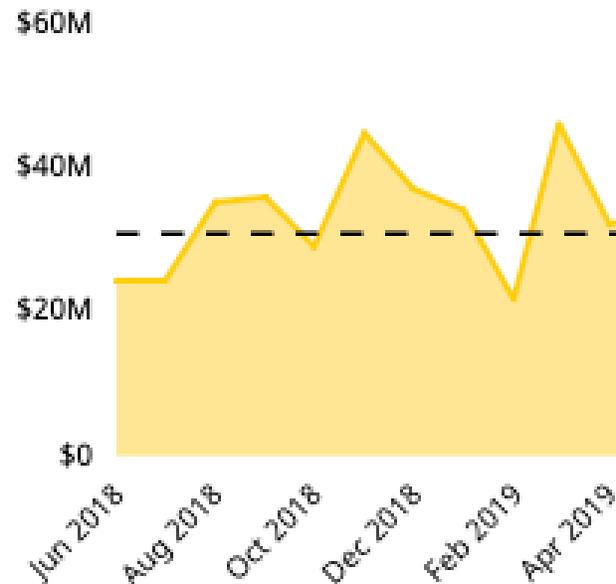

What stands in your way?

accomplish?

AT PROCUREVUE™

We can show
you how to
answer these
questions
right now.

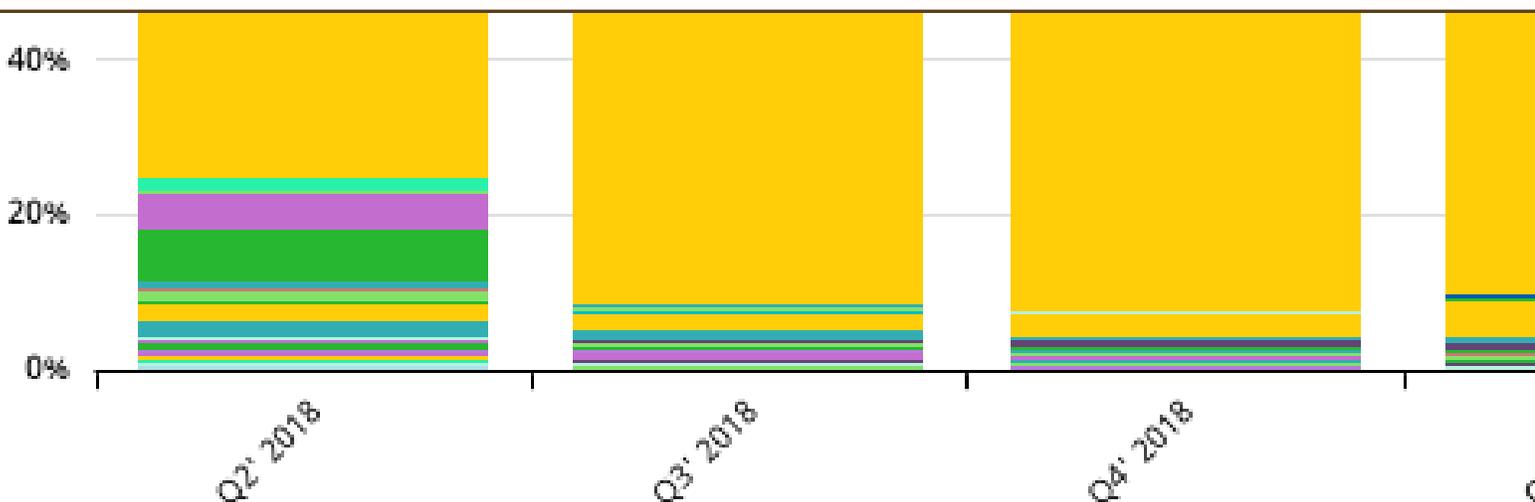

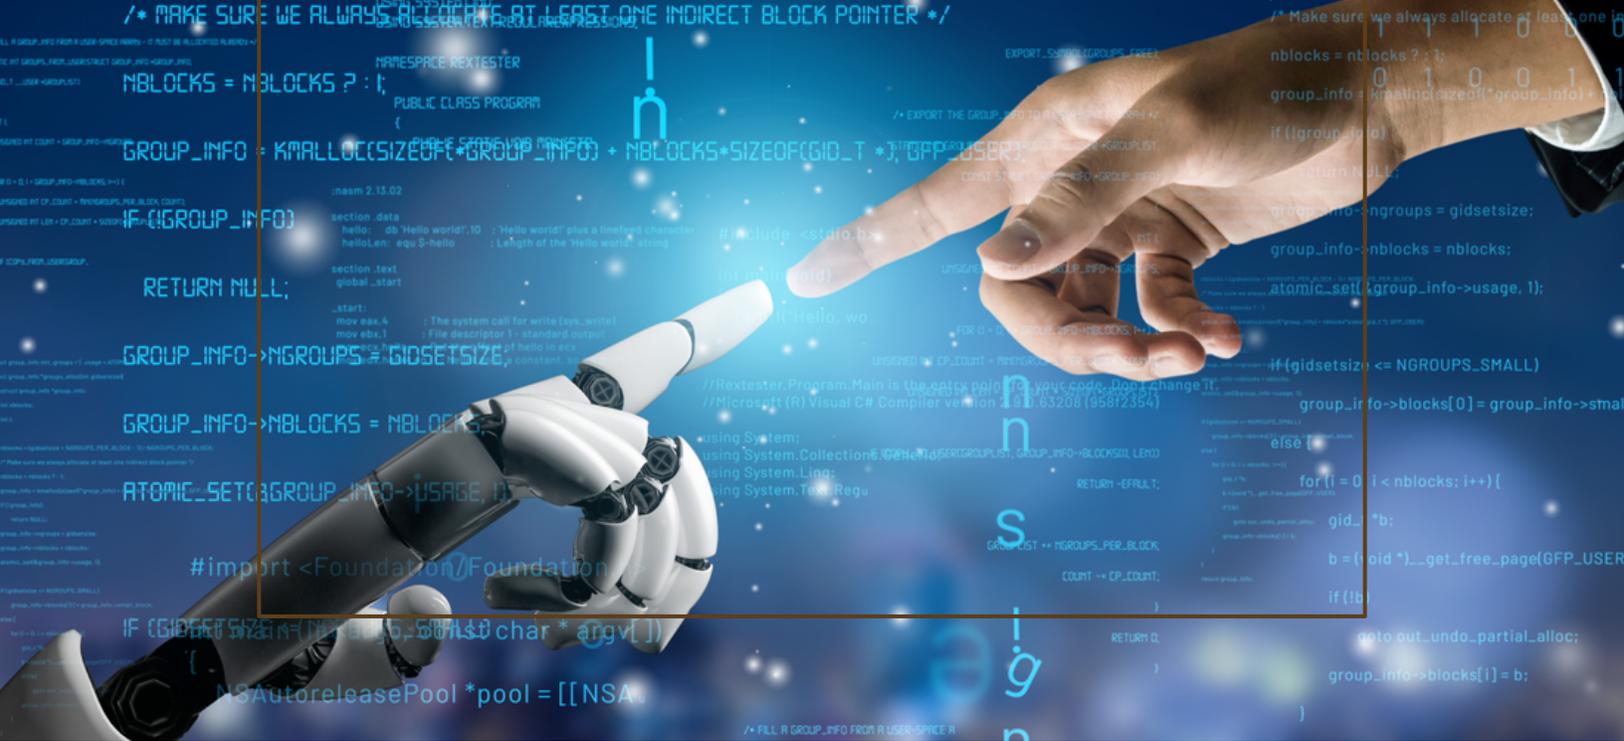

reimagining data harmony

Advances in Artificial Intelligence rapidly address these issues today. Data can be cleansed, categorized, and harmonized faster than ever. Resources can then be focused on the delivery of value, not just interpreting the information at hand.

Cleaning, analyzing, and interpreting data is what our technology does.

Matched with industry experts and analysts, we complete the loop with a more human-like technological solution.

Now, considering the problem with clean data and the potential accomplishments of having clean data, what do you want to do next? We are here to assist you in this endeavor and bring your company up to speed faster than ever.
